

T-Book

**unfolds feelings you
might have trashed**

T-BOOK issue 7:
Onion Love spring Summer 07

As folks pack on the layers for Autumn/Winter, the ever-curious and creative crew behind T-Book once again encourage us to unpeel the layers of human emotions. Continuing their tradition of telling tales through tee's, T-Book slice and dice through the faddish fashion set with their anti-trend collections, the latest entitled "Onion Love."

Taking unlikely inspiration from the basic ingredient in almost every culinary recipe- onions are thought of like feelings- an essential element in us all. Going beyond the analogy, T-Book delves into the quirky presence of this everyday object- that which we eat with and cry with. In keeping with T- Book's subtle yet loaded design narratives, "Onion Love" presents an array of imagery that hints at the intricacies of emotions.

Consistently clever in both concept and production techniques, the physical form of the onion is mimicked with sheer fabrics and prints that create visual patterns and reveal hidden messages- couples dance and duel across knit vests and button down cardigans, rows of sunglasses catch tears under translucent ultra soft cotton jersey tee's, while lines of faceless lovers sit back-to-back yet face-to-face. Straight leg trousers and school-boy shorts bear peek-a-boo pocket prints, and added treats include ties for necks and tissues for all the onion tears!

Always evolving, this season sees an exciting addition to the T-Book repertoire with footwear designed in collaboration with Peter Schmid (previously footwear designer for Donna Karan and Puma). Quality leather low-tops and hi-tops in pastel hues and dirty gold have been delicately engraved with T-Book's signature kissing pattern and those three special words.

After showing earlier this year at the Berlin's prestigious Premium, this season T-Book take their heartfelt sartorial stories to Las Vegas's Magic show and To Be Confirmed in London. Theirs is a book you wont put down.
